## SOCIAL MEDIA

 [linkedin.com/in/katerina-zhinkina-57730822b](https://www.linkedin.com/in/katerina-zhinkina-57730822b)  <http://github.com/zhinkina-katerina>

## PROFILE

I usually study on my own, spend a lot of time developing skills and read a lot.

I studied materials of the **Yandex Practicum Python Developer** course, "**Digitalize**" course. Now I`m studying materials of course "**Coding for entrepreneurs**"

## EDUCATION

**08.2013 - 07.2017**      **Karazin Kharkiv National University**  
Psychology

## EXPERIENCE

**07.2021 - present**      **Freelance**  
Junior Python Developer

- data scraping
- Api integration
- Django framework

**09.2018 - 12.2021**      **Self-employed**  
Online store owner

- work with client
- integration with services
- shop management

As the owner of an online store, I had to integrate various services through Api, automate analytics, data scraping, and other internal business processes.

I started programming by creating a CRM system in Google spreadsheets using Google script. Then, I wrote a Django **CRM project** for educational purposes. It has basic site functions, several API integrations, Celery, form handling, users. This project can be viewed at: <https://github.com/zhinkina-katerina/CRM>
